PROFILE

Data visualization and information designer with a computer science background and an MFA in progress at Northeastern University (expected Dec 2026). Creates scientific figures, research tools, and interactive data interfaces.

RESEARCH EXPERIENCE

Research Assistant, Data Visualization and Graphic Design

Games for Life, Northeastern University · *Sep 2026 – Present*

- Create data visualizations and graphics for an industry-facing report on age-friendly gaming and responsible AI within an NSF ReDDDoT-supported initiative.
- Synthesize research findings and contribute to website updates and research communication.

Research Assistant, Network Visualization

Northeastern University London · *Jun 2026 – Jul 2026*

- Designed three browser views for AI Ethics Network's 534 keywords and publication sources, refining seven working sketches through team feedback.
- Specified neighborhood and path exploration plus SVG export; contributed code, debugging, and implementation review in Svelte/D3.js, with most application code generated by Claude Code.

Research Co-op / Network Visualization Specialist

Network Science Institute · *Jul 2025 – May 2026*

- Curated institutional and OpenAlex data for Inside the Institution, covering 2,737 faculty members and 3,650 coauthorship ties.
- Designed and implemented three coordinated views, integrating organizational filters, scholar search, and profile panels with 1-Hop and 2-Hop exploration.
- Evaluated the prototype with 20 participants through tasks, questionnaires, and written feedback; produced an MFA thesis and a NetSci 2026 poster.

PUBLICATIONS

Citing Less Critically: LLMs Reshape the Rhetoric and Reach of Scientific Citation.
Y. Liu, L. Chen, **Z. Liu**, J. Lu, and D. Murray. EMNLP 2026 (Main Conference)

- Redesigned the framework figure (Figure 1) through six rounds of team feedback and created the social-distance diagram (Figure 4a).
- Built a citation-matching pipeline with 86.7% human-baseline coverage (115,278/132,913 slots) and served as one of three independent human annotators.

EDUCATION

Master of Fine Arts in Information Design and Data Visualization
Northeastern University, Boston, MA · Expected Dec 2026 · GPA: 3.93

Bachelor of Engineering in Computer Science and Technology
Tongji University, Shanghai, China · Jul 2022 · GPA: 3.70

SKILLS

Design: Information design, interaction design, scientific figures, Figma, Adobe Creative Suite
Research: Data curation, exploratory evaluation, spatial analysis, sensitivity analysis
Development: JavaScript, D3.js, Svelte, Python, pandas, HTML/CSS, SVG, Canvas, Git, GitHub Actions

SELECTED PROJECTS

Ripples into Silence

Jan 2025 – Apr 2025 (revised Sep 2026)

- Built a D3.js data story covering 95 records and 833 people recorded dead or missing within 50 km of Lampedusa, 2014–2025.
- Used ripple imagery, shared annual scales, and scroll-linked transitions from record marks to equal-sized circles, each representing one person.

Barboard

Apr 2026 – Present

- Designed and built a community website linking charts, contest archives, and member profiles with stable member IDs and a shared contest-page renderer.
- Used mobile cards for search results and horizontally scrolling voting grids with fixed identifiers.
- Automated chart retrieval and JSON conversion with Python and GitHub Actions, retaining existing data when requests fail.

TOD Boston

Oct 2024 – Dec 2024 (revised Sep 2026)

- Rebuilt a community-and-station ranking as a direct comparison of 246 redevelopment sites across nine communities, identifying 15 non-dominated candidates on three indicators.
- Used controlled comparisons and sensitivity checks to examine how reference sets, search boundaries, and weights affect site rankings.

Barvision Chongqing 2026

Jun 2026 – Aug 2026

- Designed the visual identity, ranking motion, and score reveals for the grand-final browser player; reviewed implementation largely coded by Claude Code.
- Organized, hosted, and operated three live broadcasts solo, including a roughly three-hour final with 26 segments and 242 operator key presses.

ADDITIONAL EXPERIENCE

Software Engineering Intern

Axis Communications · *Shanghai, China* · *Jul 2021 – Aug 2021*

- Refactored camera-platform initialization in embedded C++, reducing system boot time by 15%.

Visual Design Intern

Shanghai Media Group · *Shanghai, China* · *May 2020 – Aug 2020*

- Designed promotional visuals for television and social media.
